

AFTERCARE INSTRUCTIONS

Whilst this item has a high quality durable finish, it should nevertheless be treated with care. Chrome surfaces should be cleaned using only a soft damp cloth and clean water & dried using a soft cotton cloth. Bath cleaning products, even non-scratch ones could damage the finished surface.

BATH WASTE Installation & aftercare instructions

Please retain for future reference

WASTE20

INSTALLATION PROCEDURE:

1. Prior to installation check the length of the bath waste is adequate to fit your bath. Also check that your bath thickness is no larger than 10mm.
2. Disassemble the overflow and control handle:
 - a. Use a Phillips screwdriver to loosen the fixing screw on the control handle, then slide the control handle from the control spindle.
 - b. Unscrew the overflow cover plate by turning anti-clockwise.
 - c. Fit the components to the overflow hole on the bath in the order shown in the diagram.
 - d. Fit the fixing screw so it locates in the 'V-section' on the control spindle.
3. Disassemble the waste section:
 - a. The waste cover lifts out with the height adjustment screw attached.
 - b. The waste locking nut can be removed using a 16mm spanner or a flat head screwdriver.
 - c. Fit the components to the waste hole on the bath in the order shown in the diagram. Use a suitable silicone sealant (not supplied) to ensure a watertight seal is made between the waste drain and bath.
 - d. Tighten the waste locking nut by turning clockwise.
4. Test the waste mechanism. Turn the control handle clockwise to raise the plug and anti-clockwise to lower. Make any necessary adjustments to the height adjustment screw to alter the height the waste cover is raised (see diagram below).
